Luminox Bear Grylls Survival ECO 3703

Singapore, November 2020 – Bear Grylls, an outdoor survivalist and TV personality, has travelled the planet and seen first-hand the monumental devastation caused by climate change. He has been to areas hardest hit by the global threat and felt that a change is needed to make a difference.

Now, together with Luminox, we are making a commitment to the future of our planet with the creation of the new limited edition #tide X Luminox Bear Grylls Survival ECO watch. To top it off, the twin slogans, Grylls’ NeverGiveUp and Luminox’s EverySecondCounts, apply well to the challenge the entire world is facing.

This limited edition watch features a case, bezel and strap made from 100% recycled ocean-bound plastics and a portion of each sale will be donated to Project Aware (www.projectaware.org) to help protect underwater environments.

“When it comes to reducing harm to our wild places and natural environment, we need to be the change we want to see. I am so proud to partner with Luminox on our new Eco Series watch, leading the way towards a future without plastic”. - Bear Grylls

In the Luminox Bear Grylls Survival ECO 3703, a material called ‘#tide ocean material®’ is used to make the case, bezel and strap. #tide is made from 100% recycled ocean-bound plastic, in which plastic waste is registered, washed, shredded and turned into a granular material that can be injected or spun into a yarn. This plastic waste is collected by the local fishermen from the five islands in the Andaman Sea off the coast of Thailand who are trained and paid to gather and sort the waste.

This 45mm watch features a sapphire crystal, a uni-directional diving bezel, the Bear Grylls logo in Super-LumiNova at 10 o’clock, ‘Never Give Up’ at six o’clock, Luminox Light Technology at key spots on the dial and bezel, and the case back features ‘Luminox,’ ‘Bear Grylls,’ and ‘#tide

ocean material' markings. Rugged and good looking, this timepiece fits the Bear Grylls collection and mission, perfectly.

Limited Edition (1500 Pieces)

In the last 500 years, the oceans have suffered fewer extinctions than on land - at least that we know of. According to recent research, 15 animals are known to have vanished forever from the oceans since the 1500s, and many without ever being photographed. This underscores that there is no planet B.

Donation to Project Aware

A portion of the retail price from each sale will be donated directly to Project Aware (www.projectaware.org), which works with scuba divers around the globe to protect underwater environments. Not only does this watch use 100% recycled ocean-bound plastics, but money from the sale of each watch will help fund efforts in marine conservation.

ALWAYS VISIBLE

Navy SEALs, law enforcement, emergency personnel and more wear Luminox watches, and these professionals need to be able to see the time no matter the conditions. That's why Luminox uses tiny tritium gas tubes, which will provide illumination for up to 25 years. Unlike other luminosity systems, which depend on exterior light sources to charge luminous paint or a pushbutton to illuminate the watch, the luminosity is built right into Luminox watches, ensuring that you will always be able to see the time, no matter the conditions.
