

PRESS RELEASE

Luminox Bear Grylls Survival AIR Collection

Brunei, April 2021 – In 2020, Luminox announced a partnership with Bear Grylls, who is best-known for his survival and outdoor expertise, and has travelled the world to the most dangerous of places to raise awareness of the need of preparation. To continue the spirit of the partnership, Luminox is launching the new Air collection in 2021, where the watches are decked out with multiple functions reviewed and approved by Grylls himself. Luminox’s partnership with Grylls has once again been brought to the next level.

The new watches feature high-quality sapphire crystal with anti-reflective coat, a world time quartz movement (GMT) that shows all 24 different time zones, indicated by cities home to the elite special forces based around the world. To match the striking black dial, a special orange-tipped GMT hand points to the second time zone on the 24-hour inner ring, making the other time zones easy to calculate on the CARBONOX™+ bi-directional turning bezel with an aluminium ring inlay.

The screw-down crown has an orange rubber ring, for better grip, and the colour is Bear Gryll’s favourite to match the logos on the dial and the GMT hand. Even the caseback is two-toned, matching the aesthetic of the overall watch. These 45mm stainless steel Air timepieces come on either a Cordura strap or a Milanese mesh bracelet, and is water-resistant to 200 meters.

The watch also houses our signature Luminox Light Technology that makes it possible to see in low light conditions, never having to rely on any exterior light source. There is no better watch to be on Bear Grylls’ wrist than a Luminox, especially a Luminox which Grylls helped design and develop. This watch is truly perfect for any Bear Grylls’ type adventure, anywhere in the world.

ALWAYS VISIBLE

Navy SEALs, law enforcement, emergency personnel and more wear Luminox watches, and these professionals need to be able to see the time no matter the conditions. That's why Luminox uses tiny tritium gas tubes, which will provide illumination for up to 25 years. Unlike other luminosity systems, which depend on exterior light sources to charge luminous paint or a pushbutton to illuminate the watch, the luminosity is built right into Luminox watches, ensuring that you will always be able to see the time, no matter the conditions.
