

## PRESS RELEASE

### Luminox Master Carbon SEAL Automatic 3860 Series

**March 2023** – Luminox and the Navy SEALs have been proud partners for over three decades and the new Master Carbon SEAL Automatic is geared to be just as reliable and durable as the partnership. The Navy SEALs are trained to overcome what most would deem as insurmountable challenges to achieve their mission. Quitting is not an option.

Luminox has incorporated these defining pillars of strength, resilience, and permanence into its latest timepiece. With both the case and uni-directional bezel made of CARBONOX™+ and stainless steel respectively, the watch is built for dependability to withstand the test of time, just like Luminox and the Navy Seal's 30-year partnership.

There is just something special about mechanical movements; the way the pieces and parts come together to bring the movement alive and the balance wheel turning and driving the hour and minute hands. The watch is also outfitted with an open exhibition caseback to show off the Swiss Made mechanical movement powering this timepiece. Reliable and tough, the Master Carbon SEAL Automatic is truly a masterpiece that is built to last and seals Luminox as a watch brand to be reckoned with.

The Master Carbon SEAL Automatic boasts a 45mm case with two new variations, equipped with a jet-black dial and army green or cool grey dial ring option. The corresponding rubber strap mimics the dial ring colour, creating a polished uniform look. The watch features Arabic numerals and a presentation hardened mineral crystal open exhibition case back that allows the Swiss-made Automatic movement to be visible. All versions are water resistant to 200 meters and feature screw-in case backs and screw-down crowns. Like every Luminox timepiece, it incorporates the Luminox Light Technology, ensuring your timepiece is visible in any light conditions for up to 25 years.

Case Material	CARBONOX™+
Case Diameter	45 mm
Strap Material	Rubber
Strap Colour	Green or Grey
Dial Colour	Black
Functions	Day Date, Dive Bezel
Movement	Automatic
Water Resistance	200 metres

## **About Luminox**

Luminox, the original self-powered luminous watch brand, is the watch of choice for global outdoor adventure icon Bear Grylls, U.S. Navy SEALs, The Icelandic Association for Search and Rescue (ICE-SAR), Lockheed Martin's F-117 Nighthawk™ stealth and other jet fighter pilots, elite forces worldwide and professional divers. Luminox watches glow up to 25 years in any light condition. Always Visible, tough, powerful and accurate, Swiss-Made Luminox is the ultimate night vision gear for rugged outdoorsmen and other peak performers.

## **ALWAYS VISIBLE**

Navy SEALs, law enforcement, emergency personnel and more wear Luminox watches, and these professionals need to be able to see the time no matter the conditions. That's why Luminox uses tiny tritium gas tubes, which will provide illumination for up to 25 years. Unlike other luminosity systems, which depend on exterior light sources to charge luminous paint or a pushbutton to illuminate the watch, the luminosity is built right into Luminox watches, ensuring that you will always be able to see the time, no matter the conditions.
