

LUMINOX X Phyn Studio Limited Edition

November 2024 – Luminox and Phyn Studio unveil an exclusive 35th Anniversary collaborative timepiece that celebrates time and culture while injecting a youthful spirit. To mark 35 years of innovative watchmaking, featuring cutting-edge materials like Carbonox cases and tritium gas-powered Luminox Light Technology, Luminox has teamed up with acclaimed Malaysian designer Phyn Studio to craft a special limited-edition timepiece. This watch not only honours the brand's legacy of creating dependable tools for law enforcement, elite military units, maritime professionals, emergency responders, and adventurers, but also pushes design boundaries—just as Luminox has done with its use of advanced materials—while celebrating the rich cultural heritage of Southeast Asia. These exclusive watches, designed for collectors and enthusiasts alike, is a testament to the enduring craftsmanship and design innovation both brands represent while infusing a fresh and modern energy.

The commemorative watch dial features a striking world map showcasing the geographical footprints of Malaysia, Singapore and Brunei—countries where these exclusive timepieces will be available. The dial's hour markers are intricately arranged in increasing and descending sizes, symbolizing the passage of day and night, a theme consistent with Luminox's name, which reflects "light" and "night" in Latin. The sunray patterns across the dial further amplify this symbolic design and is also inspired by the 3 nation's flags to symbolize unity and peace. Phyn Studio's visionary approach aims to marry aesthetics and function, resulting in a dial that not only tells time but also narrates a story of cultural unity and natural rhythm.

In addition to the collectible appeal, the caseback design is inspired by the elegant detailing found on Malaysia's coins. Phyn Studio envisioned the timepiece as a modern-day keepsake, akin to a treasured coin. The watch will be available in two stunning colourways - silver and rose gold, representing the timeless metals of silver and copper coins, offering an elegant nod to tradition. The Luminox X Phyn Studio Limited Edition timepieces features a 44mm CARBONOX™ case and uni-directional bezel, providing a strong and durable structure that is built for those who explore new landscapes and need a dependable companion on their wrist. The classic case design with the protected crown balanced by an opposite outcropping has created the iconic "turtle shape" typically found in Luminox's top selling Leatherback Sea Turtle watch collection. Ensuring accurate and reliable timekeeping, the watches are powered by a Swiss Quartz movement 'RONDA 515'. The watches are also equipped with a Super-LumiNova® bezel light at 12 o'clock, Super-LumiNova® on every hour marker, eight signature Luminox Light Technology gas tubes to ensure readability in any lighting conditions. Embodying a spirit of adventure and vibrant energy, this collection features watches equipped with a black waterproof rubber strap and water resistance up to 100 meters.

This exclusive collaboration is limited to just 135 pieces per colour, making it a true collector's item. Each piece embodies the seamless blend of Luminox's technical expertise and Phyn Studio's cultural and modern artistry, offering a unique wearable tribute to time, place, and craftsmanship. This exclusive timepiece will soon become a treasured symbol that captures time, culture, and a nod to Luminox's commitment to create durable timepieces.

About Phyn Studio Phyn Studio is a celebrated Malaysian design house known for its bold and innovative designs. With a strong focus on storytelling through design, Phyn Studio integrates cultural elements and contemporary aesthetics to create timeless pieces that resonate on a deeper, emotional level.

About Luminox

Luminox, the original self-powered luminous watch brand, is the watch of choice for global outdoor adventure icon Bear Grylls, The Icelandic Association for Search and Rescue (ICE-SAR), pilots of the F-117 Nighthawk Stealth plane and other fighter jets, law enforcement, elite and maritime units, emergency personnel, adventurers and professional divers. Luminox watches glow up to 25 years in any light condition. Always Visible, tough, powerful and accurate, Swiss-Made Luminox is the ultimate night vision gear for rugged outdoorsmen and other peak performers.

ALWAYS VISIBLE

Many law enforcement, elite and maritime units, emergency personnel and adventurers wear Luminox watches, and these professionals need to be able to tell the time no matter the conditions. That is why Luminox uses tiny tritium gas tubes, which provides the illumination needed for up to 25 years. Unlike other luminosity systems, which depend on exterior light or power sources to illuminate the watch, the tritium gas tubes are built into Luminox watches, ensuring that you will always be able to see the time, no matter the conditions.
